

On-line: Fire Safety Awareness Training

The course can be accessed by this link: <https://www.training.cam.ac.uk/ohss/event/4795154> .

Following recent fire risk assessments of buildings not just within Engineering but across the university, a common action following these assessments is to carry out fire safety refresher training. The University has set this refresher training as an **annual refresher**. The course is designed to raise fire safety awareness and is **mandatory** for all members of the University. This training is essential for those who work within the department outside of the core hours for their building.

If you haven't completed this on-line training within the last 12 months, then please do so. The course can be accessed by this link below.

If you have already completed and passed the online fire safety training this academic year the information will only be recorded once on the University Training Booking System (UTBS).
