

Safety Alert

Ref. 09

E-bikes and e-scooters (powered by lithium-ion batteries) are becoming more common, however they also come with a risk.... Because of this we would like to issue the following alert.

Do not charge personal e-scooters or e-bikes on Department property

Do not put lithium-ion batteries in the rubbish bin

Do not store e-bikes or e-scooters where they could affect people's ability to escape from a building

Do not store e-bikes in direct sunlight

The University does not allow the use, or charging, of personal e-scooters on University property!

Local managers should ensure that no e-bikes or e-scooters are brought into Department buildings

For more information scan the QR code above to see a **Safety guide to storage and charging of E-bikes and E-scooters** or use <https://www.em.admin.cam.ac.uk/what-we-do/estate-operations/health-safety/university-fire-safety/polices-and-guidance>
