Starting 1 August – Tradebe - a new supplier for the collection of Hazardous WEEE and Hazardous Chemical Waste

Tradebe will be responsible for the collection of:

- **hazardous chemical waste** (taking over from Biffa)
- **hazardous WEEE** (waste electrical and electronic equipment) i.e. fridges, freezers, batteries and fluorescent light tubes

The chemical waste collection service will remain centrally funded and the University’s two on-site waste chemists (Pete and George) will continue in their existing roles.

Please note that how collections are booked will change.

If you need to arrange a collection from Tradebe, please refer to this guidance document. You’ll need to fill-out a pre-acceptance form and email the completed form to UK.UoC@tradebe.com and cc in safety-office@eng.cam.ac.uk. Once your order has been processed, Tradebe will email you to arrange a time and date for collection.

Who to contact if you have a query?

- [Procurement Services](#) for questions about the contract.
- [Chemical Safety team](#) for technical waste disposal queries.
- [Tradebe](#) for day-to-day queries about the service.
